About Four States

Irrigation Council

Established in 1952, the Four States Irrigation Council serves as a forum for irrigators to explore technology, exchange ideas and information, discuss specific irrigation-related problems, and learn if solutions have been found by other members. The member states are Colorado, Kansas, Nebraska, and Wyoming.

At the annual meeting each January, commercial exhibitors bring the latest technology, products, and services. The summer tour is held every two years and provides the opportunity to study the operation and maintenance of irrigation systems.

College Scholarship Program

Program

The Council is pleased to offer a \$2,000 scholarship available to a qualified student interested in a career in irrigation or water-related fields and currently enrolled in an accredited University or College in Colorado, Kansas, Nebraska, or Wyoming. The deadline for applications is May 31, 2015. For details and to apply, visit our website.
